

MOD - 7S5A

Current loop indicator - 3.5 digits
Scaleable digital 4-20mA

The MOD-7S5A is an advanced, low cost current loop indicator, which provides measurement in applications where a scalable current input is needed. Any signal can be scaled to display directly in engineering units with the wide ranging available. Scaling and calibrating MOD-7S5A is very easy. For example: all inputs 4-20mA can be scaled to display 0-1500kg
